

“A FUTURE IN BIOMEDICINE” Programme - 2024 Call

TERMS & CONDITIONS

The articles of association of the *Fundació Institut de Recerca Biomèdica (IRB Barcelona)* (hereafter referred to as IRB Barcelona or Institute) establish that the Institute will promote activities that address collaboration and knowledge transfer and also launch calls for fellowship (herein referred to as grant) applications and subsequently present the awards of the same.

I. Objective

These Terms and Conditions serve to regulate the undergraduate internship grants for the 2024 call of “A Future in Biomedicine”.

II. Grant Call

The “A Future in Biomedicine” (AFIB) Programme is aimed at outstanding and highly motivated students in the last year of their degree. Students should show a strong interest in the fields of biology, biomedicine, chemistry, physics, pharmacy, structural biology, computational sciences, or other related areas. Four grants are offered to cover internships from September 2024 to July 2025.

Students will spend up to 20 h per week in an IRB Barcelona lab during their last year of undergraduate studies (Academic year 2024/2025), upon agreement with the project supervisor at IRB Barcelona.

Awardees will receive a stipend of **€200 gross per month**. The stipends included in this call will be covered by IRB Barcelona structural funds for a maximum of 11 months. Awardees will have medical insurance through the Spanish Social Security System and will be covered by accident insurance.

Awardees will be offered the opportunity to participate in in-house institutional activities. In addition, they will receive complementary training for career development either through the series of courses offered at IRB Barcelona or “ad-hoc” ones organised for undergraduate students.

Upon completion of the programme, awardees will be provided a reference letter from their respective project supervisor at IRB Barcelona.

A grant agreement regulating the internship will be signed between the university in which the student is enrolled, IRB Barcelona, and the student.

Participation in the AFIB Programme will not imply a contractual relationship between the awardee and IRB Barcelona. Only in the exceptional case that the awardee finishes his/her undergraduate studies before the end date of the internship agreed with IRB Barcelona will the Institute contract him/her for the days needed to complete the agreement.

IRB Barcelona will cover the cost of a 3-day trip to visit the Radboud Institute of Molecular Life Sciences (RIMLS, The Netherlands). During this visit, awardees will receive detailed information about the RIMLS “Molecular Mechanisms of Disease” MSc Programme at the Radboud University (RU) and about the Radboud Institute for Molecular Life Sciences (RIMLS).

If a visit to RIMLS cannot be arranged, IRB Barcelona will organise an informative session to explain the Molecular Mechanisms of Disease MSc Programme led by the RU and RIMLS.

IRB Barcelona will encourage awardees to apply to MSc fellowship calls run by private and public organisations. In this regard, awardees will be fully supported by their respective project supervisors and also by the IRB Barcelona administration team in all aspects related to these applications.

The group leader at IRB Barcelona (or a designated researcher) previously assigned to and agreed with the awardee before the signature of the grant will be the project supervisor. The supervisors will oversee that the duties assigned to the awardees are fulfilled and will notify IRB Barcelona’s Academic Office of issues affecting the undertaking of the assigned duties or other pertinent circumstances so that corrective measures can be taken and/or proceedings to withdraw the grant can be started.

III. Requirements and Selection Criteria

1. The AFIB Programme is addressed to students who fulfil the following requirements:

- Completion of at least 180 ECTS credits of a BSc degree in Biology, Pharmacy, Mathematics, Structural Biology, Physics, Biomedicine, Medicine, Chemistry or related fields by September 2024. Students awarded these grants are expected to complete their undergraduate studies by July 2025.

INSTITUTE
FOR RESEARCH
IN BIOMEDICINE

- Enrolment in a local university. Exceptions for non-local students can be made if their study plan and university guidelines allow them to do an internship under the conditions of this call. These cases will be treated individually.
- Minimum BSc average mark of 7/10
- Good knowledge of English

2. Candidates will be selected exclusively on merit, on the basis of academic records, motivation letter, as well as other criteria, such as internationalisation, previous research experience, and letter of reference. No selection criteria for positive or negative discrimination will be applied.

IV. Application Procedure

Applicants should send the documents mentioned below to phd@irbbarcelona.org before the deadline, indicating "A Future in Biomedicine candidacy" in the subject box.

1. CV

2. A scanned copy of the applicant's certified Academic Record. These documents must show the grades attained in exam periods

3. Additional certificates, prizes, and recognitions

4. Motivation letter

5. A letter of reference from university lecturers or scientists with whom the applicant has studied or worked. Only letters with an official letterhead and signature will be accepted.

Applicants should indicate in the e-mail up to two research groups in which they would like to work (in order of preference). Moreover, if they are interested in a particular research group, they should refer to it in the motivation letter. More information on the research activities of each group can be found on IRB Barcelona's webpage.

Referees must send their letters directly to IRB Barcelona to the address: phd@irbbarcelona.org. Only letters with an official letterhead and signature will be accepted. Applicants are responsible for ensuring that their referees send the letter. Applications not accompanied by this letter will not be processed.

Applicants should submit information wherever possible in English (CV, motivation letter, summary of work experience). If the certified academic record is not in Catalan, Spanish or English, applicants should also attach a translation into one of these languages.

V. Selection

1. A Review Board comprising IRB Barcelona group leaders and members of the IRB PhD Advisory Committee will be charged with drawing up a preliminary list of candidates.
2. Group leaders and members of the PhD Advisory Committee may interview the selected candidates and draw up the final list of candidates.
3. Applicants can follow the status of their applications upon request by contacting phd@irbbarcelona.org
4. Applicants who have not been successful but who have received a positive evaluation will be put on a waiting list to cover possible renunciations and future positions.

VI. Calendar

- 10 May 2024 - Call opening
- 16 June 2024 - Call deadline and preselection of candidates
- End June 2024 - Notification of selection results
- September 2024 - Beginning of the internships and start of the programme
- July 2025 - Receipt of students' summary reports

At the end of the internship, awardees must send a summary report, which will be sent to IRB Barcelona's Academic Office at phd@irbbarcelona.org and the respective project supervisor. Students will also present their research work undertaken over the academic year in an open seminar organised for the IRB Barcelona community.

VII. Communication of Grant Award

Selected candidates will be informed of the grant award via email. After acceptance of the grant, awardees will receive detailed information.

VIII. Rights of Awardees

Awardees will have the following general rights:

1. To be provided with the necessary assistance to perform their studies and research activities. They will have a tutor who will provide assistance during their internship at IRB Barcelona.
2. To participate in complementary calls for funding to attend scientific congresses or other activities related to their studies.

INSTITUTE
FOR RESEARCH
IN BIOMEDICINE

3. To exercise intellectual property rights derived from their training activity in accordance with their contribution, as established in the Intellectual Property Law, approved by Royal Decree 1/1996, 12 April. These rights will be independent, compatible and accumulative with other rights that may arise from the research developed, without negatively affecting the rights of the joint effort when the awardee participates in or is associated with a joint research project.
4. To have possible industrial property rights regulated by Patent Law 24/2015, 24 July, and Royal Decree 55/2002, 18 January, governing the exploitation and license of rights on discoveries made in public research organisations. Said rights will not be linked to the grant.

IX. Responsibilities of Awardees

Awardees must:

1. Fulfil the terms and conditions established in this call, as well as the conditions regarding the internships established by the university where they are enrolled.
2. Perform their research activity under the supervision of a project supervisor at IRB Barcelona while the grant is effective. In addition, they must perform the activities foreseen in the research training and specialisation programmes of the Institute, as well as satisfactorily fulfil the objectives of the training programme.
3. Attend the activities and complementary training offered by the IRB Barcelona when the event is part of the training for the undergraduate community or any other activity recommended by the Academic Office.
4. Comply with the internal regulations of IRB Barcelona, particularly regarding working conditions and the prevention of occupational risks.
5. Send a summary report to the Academic Office (phd@irbbarcelona.org) and also to the project supervisor upon completion of the programme.
6. Inform IRB Barcelona in advance of their participation in the authorship of any publication or communication related to the work performed under the current call.
7. Inform IRB Barcelona if they receive other grants or funding.
8. Comply with the regulations derived from the “internship agreement” between the university, IRB Barcelona and the awardee.

X. Termination of grants

The grants will be revoked if the awardee has withheld or provided falsified information. The grant will also be revoked if the awardee does not fulfil the responsibilities described in clause IX.

XI. Incompatibility

Awardees will be devoted exclusively to the research or technical training and specialisation activities defined in this call. The grants included in this call are not compatible with any other grant or fellowship for undergraduate internships from any public or private organisation.

XII. Data Protection

Following Regulation (EU) 2016/679 (General Data Protection Regulation), Organic Law 3/2018 of December 5, and other applicable regulations governing personal data protection, any personal data provided by applicants will be incorporated into the Academic file of IRB Barcelona, for which the Institute is the data processor. The purpose of keeping such data is to manage our relationship with applicants. Applicants may exercise the rights of access, rectification deletion, opposition, transfer and expiry, as well as limitation in data processing of said information by contacting the Institute at the following e-mail address: dataprotection@irbbarcelona.org, or by writing to the following postal address: C/ Baldiri Reixac, 10, 08028, Barcelona.

XIII. Dissemination

Any information regarding this grant will be placed on the announcement board on the IRB Barcelona web site.

XIV. Clarification

The Head of Human Resources and Academic Affairs Department of IRB Barcelona or designated representative will be responsible for clarifying queries regarding these terms and conditions.

Barcelona, 10 May 2024

Maribel Labrid
Head of Human Resources and Academic Affairs, IRB Barcelona

ANNEX 1. IRB Barcelona Research groups participating in the 2024 A Future in Biomedicine call

- Amino Acid Transporters and Disease
- Laboratory of Molecular Biophysics
- Mitochondrial Biology and Tissue Regeneration
- Microtubule organization in cell proliferation and differentiation
- Biomedical Genomics

This programme is the result of a collaboration agreement between IRB Barcelona and the Radboud Institute for Molecular Life Sciences.
